

Environmental Policy

Driven International are a multidisciplinary practice offering architecture, engineering and visualisation and design of sports, leisure, driving and motorsport destinations.

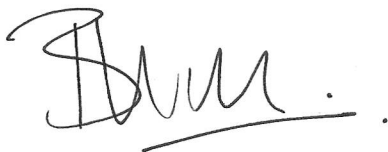

We recognise that the operation of Driven comes with an impact on the environment and we understand our responsibility to minimise this to contribute positively to the industries we serve. We seek to develop effective sustainable practices and through the implementation of this policy and the Driven Sustainability Strategy, we will be on track to become leaders in our specialist industries.

Driven are committed to reducing their environmental impact through the implementation of the following:

- A commitment from Directors to Environmental Sustainability.
- Effective communication of our environmental goals to our staff and the public including relevant training where appropriate.
- The Driven Sustainability Strategy, detailing actions and targets that have been developed across 6 categories (Carbon Neutral, Travel, Utilities, Waste and Recycling, Community and Partnerships and Accreditations). This includes:
 - Our Carbon Neutral Commitment.
 - Using more sustainable methods of transport for business travel when appropriate.
 - Tracking and monitoring of business travel mileage and utility use.
 - Working with the office partner to review current waste disposal methods.
 - Involving ourselves in local volunteering activities.
 - Applying for accreditations to align ourselves with global and industry standards.
- Offer an environmentally conscious design approach throughout projects ensuring the environment in and around sites are preserved to the best of our ability.
- An annual report to showcase our progress and achievements relating to environmental sustainability, including key data and facts.
- Targeting consistent progress towards the goals we set out to mitigate our environmental impacts.

Driven are committed to reviewing this policy annually to ensure compliance with environmental legislation and to reflect the goals of the Driven Sustainability Strategy.

Driven have made the Driven Sustainability Strategy and Environmental Policy available to view on our website.
